 ADULT OCCUPANT

Total 36.3 Pts / 95%

 GOOD     ADEQUATE     MARGINAL     WEAK     POOR

Frontal Offset Deformable Barrier 7.5 / 8 Pts

Passenger                      Driver

Detailed description: This panel shows the results for the Frontal Offset Deformable Barrier test. It features two side-view illustrations of a crash test dummy. The Passenger dummy is shown with a green torso and yellow legs, indicating a 'GOOD' rating. The Driver dummy is shown with a yellow torso and green legs, indicating an 'ADEQUATE' rating.

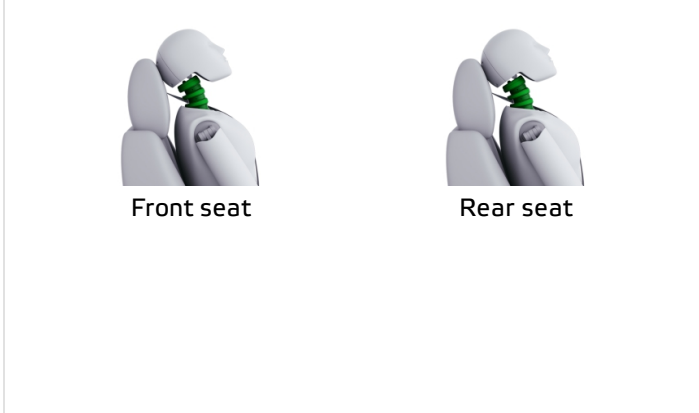

Frontal Full Width 7.6 / 8 Pts

Rear Passenger                      Driver

Detailed description: This panel shows the results for the Frontal Full Width test. It features two side-view illustrations of a crash test dummy. The Rear Passenger dummy is shown with an orange torso and green legs, indicating a 'MARGINAL' rating. The Driver dummy is shown with a yellow torso and green legs, indicating an 'ADEQUATE' rating.

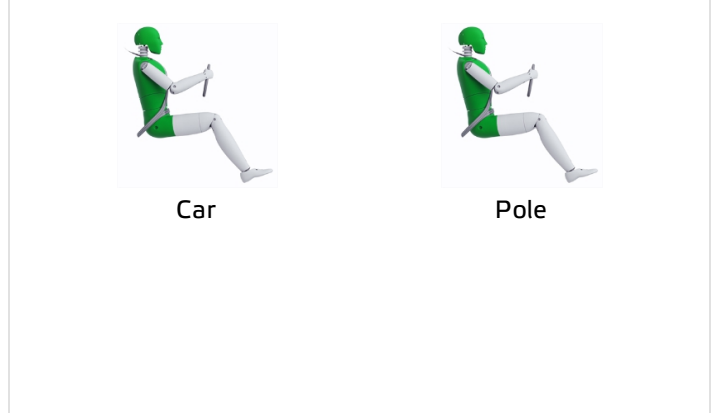

Whiplash Rear Impact 1.7 / 2 Pts

Front seat                      Rear seat

Detailed description: This panel shows the results for the Whiplash Rear Impact test. It features two rear-view illustrations of a crash test dummy's head and neck. The Front seat dummy is shown with a green neck, indicating a 'GOOD' rating. The Rear seat dummy is shown with a green neck, indicating a 'GOOD' rating.

Lateral Impact 15.5 / 16 Pts

Car                      Pole

Detailed description: This panel shows the results for the Lateral Impact test. It features two side-view illustrations of a crash test dummy. The Car dummy is shown with a green torso, indicating a 'GOOD' rating. The Pole dummy is shown with a green torso, indicating a 'GOOD' rating.

## Comments

The passenger compartment of the Golf remained stable in the frontal offset test. Dummy readings indicated good protection of the knees and femurs of the driver and passenger. VW showed that a similar level of protection would be provided to occupants of different sizes and to those sitting in different positions. In the full-width rigid barrier test, protection of the chest of the rear passenger was marginal but, otherwise, protection was good or adequate for both the driver and rear passenger. In the side barrier impact, protection of all critical body areas was good and the car scored full points in this test. However, during the test, the rear driver's side door opened and the car was penalised for the risk of occupant ejection that this represents. In the side pole impact, protection of all critical body areas was good and the Golf scored maximum points in this test. Tests on the front seats and head restraints demonstrated good protection against whiplash injuries in the event of a rear-end collision. A geometric assessment of the rear seats also indicated good whiplash protection. The standard-fit autonomous emergency braking (AEB) system performed well in tests of its functionality at the low speeds at which many whiplash injuries occur, with collisions avoided in all test scenarios.

 ✘ Installation not allowed

**Comments**

In the frontal test, protection of all critical body areas was good for both dummies, apart from the neck of the 10 year dummy which lost a fraction of a point and was rated as adequate. In the side barrier impact, all critical body areas were well protected for both dummies and the Golf scored maximum points in this part of the assessment. The front passenger airbag can be disabled to allow a rearward-facing child restraint to be used in that seating position. Clear information is provided to the driver regarding the status of the airbag and the system was rewarded. All of the restraint types for which the Golf is designed could be properly installed and accommodated in the car.

Vulnerable Road Users	7.8 / 12 Pts
System Name	Front Assist
Type	Auto-Brake with Forward Collision Warning
Operational From	6 km/h

**Comments**

The bonnet provided predominantly good or adequate protection to the head of a struck pedestrian, with some poor results recorded on the stiff windscreen pillars. The bumper provided good protection to pedestrians' legs and protection of the pelvis was also good at all test positions. The Golf's AEB system can detect vulnerable road users like pedestrians and cyclists, as well as other vehicles. In tests, the system's response to such road users was adequate, with collisions avoided or mitigated in most cases.

AEB Inter-Urban

 2.5 / 3 Pts

System Name	Front Assist
Type	Autonomous Emergency Braking and Forward Collision Warning
Operational From	6 km/h
Additional Information	Supplementary warning

Comments

The Golf has a seatbelt reminder system for the front and rear seats. The AEB system performed well in tests of its response to other vehicles at highway speeds. A driver-set speed limiter helps the driver not to over-speed while a lane support system helps prevent inadvertent drifting out of lane, as well as intervening more aggressively in some more critical situations.
